SUMMARY

Full Stack Developer who has shipped 4 production applications end to end with Next.js, TypeScript, Node.js and PostgreSQL. Delivered **2 client facing news publishing platforms in 8 months** as the sole developer, then independently designed and launched **2 live LLM products in 11 months**: a voice based interview preparation platform and a real time collaborative chat application. Strong across **secure authentication and role based access control, RESTful and streaming APIs**, relational data modelling with **Prisma and Supabase**, third party integrations, **performance and SEO optimisation**, and cloud deployment on **Vercel**.

SKILLS

Languages: TypeScript, JavaScript (ES6+), SQL, HTML5, CSS3

Frontend: Next.js (App Router, SSR, ISR, Server Actions), React.js, Tailwind CSS, Responsive Design, Monaco Editor, Recharts, Excalidraw

Backend and APIs: Node.js, Express.js, RESTful API Design, Streaming Responses, Webhooks, Server Side Rendering, Caching

Databases and ORM: PostgreSQL, MongoDB, Prisma ORM, Supabase (Database, Auth, Storage, Realtime, Row Level Security)

Integrations: Google Gemini, OpenRouter, Vercel AI SDK, Web Speech API, GitHub API, Razorpay, Resend, OpenWeatherMap, Piston

Security: NextAuth.js, JWT Sessions, OAuth 2.0, Magic Link Authentication, Firebase Auth, Role Based Access Control

Tools and Platforms: Git, GitHub, Vercel, Sentry, VS Code, Cursor, Agile Delivery, SEO

WORK EXPERIENCE

Full Stack Developer (Independent)

Oct 2025 to Present

Kochi, Kerala, India

- **Shipped 2 production applications in 11 months**, owning architecture, database schema, frontend, backend and model integration, and **releasing 100% of builds through continuous deployment on Vercel**.
- **Integrated 3 model and execution providers** (Google Gemini, OpenRouter, Piston) and **2 browser speech APIs** across the two products.
- **Secured 100% of database tables** with Row Level Security policies, enforcing per user data isolation across multi tenant PostgreSQL schemas in Supabase.
- **Built streaming response pipelines across both products**, adding structured output parsing and session level model memory to keep interactions responsive under load.

Full Stack Developer

Feb 2025 to Sep 2025

K4rm4 Social Feedback Systems, Kochi, Kerala, India

- **Delivered 2 client facing platforms in 8 months** as the sole developer, averaging **one production launch every 4 months** across requirement gathering, architecture, frontend, backend, deployment and post release monitoring.
- **Reader experience:** shipped **6 reader facing features** on London News, category based browsing, article detail pages, email signup and login, subscriptions, mood surveys and a live weather widget.
- **Admin dashboard:** delivered full CRUD across **5 entities** and **migrated 100% of content operations** into a single interface, covering articles, categories, slugs, users and hosted images.
- **Security:** protected **100% of admin routes and mutations** with NextAuth.js JWT sessions and role based access control.
- **Integrations:** consolidated **4 external services** into one Next.js codebase, OpenWeatherMap for weather, Resend for newsletter broadcasting and Supabase Storage for image hosting, and **instrumented 100% of both platforms** with Sentry for real time error tracking.
- **Data layer:** **typed both codebases 100% in TypeScript**, modelled the relational schema with Prisma ORM over PostgreSQL and tuned queries across **2 core route groups**, category feeds and article detail pages.

- **Performance and SEO:** achieved **100% responsive coverage** across mobile, tablet and desktop breakpoints on both platforms, applying SEO best practices across metadata, semantic markup and dynamic routing.

PROJECTS

dryrun AI, Interview Preparation Platform

Next.js, React, TypeScript, Tailwind CSS, Google Gemini, Supabase (PostgreSQL, Auth, RLS), Web Speech API, Monaco Editor, Excalidraw, Recharts, GitHub API, Piston, Vercel. Live: dryrunai.vercel.app

- **Built 6 interview formats across a 13 technology stack:** voice interview, repository based interview, whiteboard round, coding round, salary negotiation and a **3 interviewer panel** with distinct synthesised voices.
- **Voice interviewer:** implemented a real time spoken loop on the Web Speech API where the model asks contextual follow up questions and privately scores every answer.
- **Repository awareness:** integrated the GitHub API so the platform reads a public repository and interviews the candidate on code they actually wrote.
- **Graded rounds:** scored whiteboard answers from Excalidraw diagrams and executed coding submissions against real test suites through the Piston API inside an embedded Monaco editor.
- **Adaptive difficulty:** built a mode that drills one topic progressively deeper each turn until it identifies the knowledge ceiling.
- **Reporting:** delivered per session report cards scoring **100% of answers** individually, with model answers, delivery coaching and Recharts trend visualisations.

ZooperChat, Real Time Collaborative Chat Application

Next.js, React, TypeScript, Tailwind CSS, Vercel AI SDK, OpenRouter, Supabase (PostgreSQL, Auth, Realtime, RLS), Web Speech API, Vercel. Live: zooperchat.vercel.app

- **Streaming chat:** built a token by token streaming interface on the Vercel AI SDK with multi model routing through OpenRouter.
- **Cloud sync:** persisted conversations to PostgreSQL so **100% of chat history** stays in sync across every device a user signs in on.
- **2 sign in methods:** Google OAuth and passwordless one time email magic link, both through Supabase Auth.
- **Live collaboration:** developed join by link rooms on Supabase Realtime with presence tracking, typing indicators, usernames and per message model memory.
- **Sharing and voice:** added project based chat grouping, short read only share links, and a hands free voice mode on the Web Speech API.

PETme, Peer to Peer Pet Marketplace

React.js, Node.js, Express.js, MongoDB, Firebase Authentication, Razorpay, Material UI, Bootstrap. Live: petmebysoorvan.vercel.app

- **Marketplace build:** developed listings for pets plus food and accessory purchases, backed by **RESTful APIs across 3 resource groups** in Node.js and Express.js.
- **Payments and auth:** integrated Razorpay for online payments and Firebase Authentication for secure login and session handling.
- **Frontend:** built a responsive interface with React.js, Material UI and Bootstrap, deploying frontend and backend to Vercel.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

2018 to 2022

LBS College of Engineering, Kasaragod, Kerala

CERTIFICATIONS

MERN Stack Web Development, Luminar Technolab, Kochi, 2023

LANGUAGES

English, Malayalam
